

Canterbury School – Steele Hall

New Milford, CT

Services

General Contracting

Construction Type

Education – Grades 9-12

Size

42,000 square feet

Contract

\$8,400,000

Architect

Butler Rogers Baskett Architects

- Expansion and renovation of Steele Hall, which houses the library, cafeteria and administrative offices.
- The building was expanded on three sides and remained open during construction.
- Work on the cafeteria included a 4,400 square foot glass expansion on two sides of the building, renovation of the seating area and improvements to the kitchen and servery.
- Administrative offices were expanded with a new 5,600 square foot addition on the front of the building with stone facade to match other campus buildings. Existing administrative offices were extensively renovated throughout.
- High sloped ceilings, exterior granite stone facing with limestone window surrounds, aluminum and wood frame interior view windows, and wood wainscoting are architectural design features throughout the building. Wood framed panels were installed to the underside of the compound-curved existing roof/ceiling within the library.
- Work on the library included upgrades to the lighting, HVAC and finishes.
- Installed a thermoplastic polyolefin (TPO) roofing system. This type of roofing membrane is very popular due to its exceptional resistance to ultraviolet, ozone and chemical exposure.

"A.P. Construction was committed to fulfilling our project goals at all times throughout the construction process. They identified and responded to our issues in a thorough and expedient manner in order to maintain the budget and schedule. A.P. Construction is the company to use on a very difficult and time-constrained project."

Ted Bent, Business Manager, Canterbury School
