

Services

General Contracting

Construction Type

Healthcare – Outpatient

Size

11,000 square feet

Contract

\$1,300,000

Architect

Shepley Bulfinch

- Project involved the construction of an outpatient center on the third floor of an office building with a large rehabilitation facility. An interesting design feature of the building is its outward-sloping windows.
- Spaces included a reception and waiting area, exam rooms, staff lounge and lockers, rehabilitation center, changing rooms, and restrooms.
- All work was completed within a tight schedule with long lead items such as lights, millwork, and doors being received on time.
