Peter Gisolfi Associates, LLP

---

- Multi-building project that includes the demolition and removal of the existing school building and replaced with a new Education Center and Community Center totaling over 27,000 sq. ft.
- New construction for the Education Center, Chapel, and Gymnasium began with site excavation to allow for concrete footings and foundations, structural steel framing, and brick and stone veneer, as well as composite slate roofing for the Chapel.
- Energy savings initiatives on the project include Geo-Thermal wells, electric vehicle charging stations, and new solar shingle roof systems.
- Site improvements include new asphalt paving in the front and back parking areas in of the church and the back, new walkways, new playground, and new fencing for the property.
- Construction management services included: constructability review, budgeting, value engineering, subcontractor bid and award, safety and logistical planning, pre-purchase program, scheduling, and construction.
