General Contracting

Construction Type

Library

Size

65,000 square feet

Contract

\$9,900,000

Architect

Tuthill + Wells

- Multi-phase construction consisting of a 31,000 square foot addition and 34,000 square foot renovation. Phasing process allowed library to remain open during construction with minimal disruption.
- Project details include a new children's area with a vaulted ceiling, brick arch, radiant heat flooring and a story time pit.
- Installation of a new data center with CAT 6 wiring, recessed floor boxes and computer stations.
- Exterior site enhancements include extending the parking lot and storm retention system, addition of retaining walls, landscaping and a memorial garden.
- Custom features of this project include sprayed acoustics at high ceilings, floating ceilings, pendant lighting and custom-designed millwork.

"The project involved new construction on three sides of the library, a complete renovation of the existing spaces, and extensive site work all to be done while the library was open to the public. This required multiple phases with constant adjustments. A.P. Construction's team was able to plan and execute this complex schedule while maintaining the safety of the staff and public as well as providing the quality of work we required. A great company to work with."

Bruce Tuthill, Principal, Tuthill and Wells Architects
